

D30® INSOLE RANGE

D30® Decell

Developed with leading UK Orthotics specialists, Rightstride® Orthotics, the D30® Insoles are engineered to offer genuine injury preventative and rehabilitating capabilities in a packaged, ready for retail form.

Our three models include:

COMFORT / SUPPORT / PERFORMANCE

While the potential cause of foot injuries are numerous, the need is clear. In a recent study of 200 subjects conducted by Rightstride®, pressure plates were used to measure four areas of potential correction:

- ☑ Impact pressure distribution
- ☑ Dynamic pressure attenuation
- ☑ Acceleration control
- ☑ Stability of the mid foot

72% of the subjects tested were diagnosed with a high risk of injury. These revolutionary insoles tackle these four areas and encourage a natural and dynamic transition from heel to forefoot.

D30® SHOCK ABSORBING MATERIAL IN THE HEEL AND BODY ACROSS ALL RANGES.

DEVELOPED WITH LEADING UK ORTHOTICS SPECIALISTS, RIGHTSTRIDE®.

PP CONTROL CHASSIS FEATURED ON THE PERFORMANCE INSOLE ENGINEERED TO ENABLE ULTIMATE ARCH SUPPORT.

PRODUCT PERFORMANCE

D30®

LEADING COMPETITOR

The D30 Insole (left) reduces the pressure felt on the underside of the foot (green = low pressure). The competitor insole (right) fails to match this (red = high pressure). The acceleration control is also maintained much better by the D30 Insole, highlighted by the fact that the black dotted line is more consistent along the pink midline.*

*Testing conducted by Rightstride® Orthotics.
